## 1.3. 问题详情

规则 Unnecessary imports should be removed		
+0.001+#2+	There's no reason to import modules you don't use; and every reason not to: doing so needlessly increases the load. Finally, importing a module twice is pointless and confusing. Noncompliant Code Example	
	import A from 'a'; // Noncompliant, A isn't used import { B1 } from 'b';	
	console.log("My first JavaScript");	
	import { B1 } from 'b'; // Noncompliant, already imported	
	console.log(B1);	
	Compliant Solution	
	import { B1 } from 'b';	
	console.log("My first JavaScript");	
	console.log(B1);	
文件名称	违规行	
Container.vue	13, 14, 15, 16, 17, 18	

	_	
规	mıl	Control structures should use curly braces
大い	TIII	Control Structures should use curiv braces

#### 规则描述

While not technically incorrect, the omission of curly braces can be misleading, and may lead to the introduction of errors during maintenance.

Noncompliant Code Example

if (condition) // Noncompliant executeSomething();

**Compliant Solution** 

if (condition) { executeSomething();

See

MISRA C:2004, 14.8 - The statement forming the body of a switch, while, do ... while or for statement shall be a compound statement

MISRA C:2004, 14.9 - An if (expression) construct shall be followed by a compound statement. The else keyword shall be followed by either a

compound statement, or another if statement MISRA C++:2008, 6-3-1 - The statement forming the body of a switch, while, do ... while or for statement shall be a compound

MISRA C++:2008, 6-4-1 - An if (condition) construct shall be followed by a compound statement. The else keyword shall be

followed by either a compound statement, or another if statement MISRA C:2012, 15.6 - The body of an iteration-statement or a

selection-statement shall be a compound-statement CERT, EXP19-C. - Use braces for the body of an if, for, or while statement

CERT, EXP52-J. - Use braces for the body of an if, for, or while statement

文件名称	违规行
flatted.php	41, 43, 79, 87, 96, 132

Selectors of lower specificity should come before overriding selectors of 规则 higher specificity

文件名称

play-list.scss

```
Dorder of instructions in CSS is important: instructions with equal specificity that occur later in the file take the priority. But when a selector with a higher specificity (e.g. p a { color: green;} ), comes before the selector it overrides (e.g.: a { color: green;} ), the priority is given to the first one. Even if it works properly, this is harder to anticipate the behaviour of the stylesheet while reading as it goes against the principle that the last instruction takes the priority. Noncompliant Code Example

p a { color: green; }

a { color: blue; }

Compliant Solution

a { color: blue; }

p a { color: green; }

p a { color: green; }
```

违规行

39, 69

<mark>规则</mark> Function	ns should not contain too many return statements
规则描述	Having too many return statements in a function increases the function's essential complexity because the flow of execution is broken each time a return statement is encountered. This makes it harder to read and understand the logic of the function.  Noncompliant Code Example With the default threshold of 3:
	<pre>function myFunction(){ // Noncompliant as there are 4 return statements   if (condition1) {     return true;   } else {     if (condition2) {        return false;     } else {        return true;     }   }   return false; }</pre>
文件名称	

Sonar Report

flatted.ph	0	139
	=	

规则 Pseudo-	-class selectors should be valid	
The W3C specifications define the valid pseudo-class selectors Only the official and browser-specific pseudo-class selectors should be used to get the expected impact in the final rendering.  Noncompliant Code Example		
a:hoverr { /* Noncompliant; there is a typo on the word "hover }		
Compliant Solution		
	a:hover {	
j

规则	类型	违规级别
Callbacks of array methods should have return statements	Bug	阻断
Loops should not be infinite	Bug	阻断
"yield" expressions should not be used outside generators	Bug	阻断
"in" should not be used with primitive types	Bug	严重
Function calls should not pass extra arguments	Bug	严重
"Symbol" should not be used as a constructor	Bug	严重
Results of "in" and "instanceof" should be negated rather than operands	Bug	严重
"super()" should be invoked appropriately	Bug	严重
Destructuring patterns should not be empty	Bug	主要
Conditionally executed blocks should be reachable	Bug	主要
Jump statements should not occur in "finally" blocks	Bug	主要
Property names should not be duplicated within a class or object literal	Bug	主要
"NaN" should not be used in comparisons	Bug	主要
Return values from functions without side effects should not be ignored	Bug	主要
Generators should "yield" something	Bug	主要
Function argument names should be unique	Bug	主要
Related "if/else if" statements and "cases" in a "switch" should not have the same condition	Bug	主要
All branches in a conditional structure should not have exactly the same implementation	Bug	主要
The output of functions that don't return anything should not be used	Bug	主要
Values should not be uselessly incremented	Bug	主要
Special identifiers should not be bound or assigned	Bug	主要
Jump statements should not be followed by dead code	Bug	主要
Properties of variables with "null" or "undefined" values should not be accessed	Bug	主要

A "for" loop update clause should move the counter in the right direction	Bug	主要
Variables should not be self-assigned	Bug	主要
Non-empty statements should change control flow or have at least one side-effect	Bug	主要
Calls should not be made to non-callable values	Bug	主要
Non-existent operators '=+', '=-' and '=!' should not be used	Bug	主要
"new" operators should be used with functions	Bug	主要
Identical expressions should not be used on both sides of a binary operator	Bug	主要
Array-mutating methods should not be used misleadingly	Bug	主要
Strict equality operators should not be used with dissimilar types	Bug	主要
Setters should not return values	Bug	主要
Comma and logical OR operators should not be used in switch cases	Bug	主要
Bitwise operators should not be used in boolean contexts	Bug	主要
Collection elements should not be replaced unconditionally	Bug	主要
Attempts should not be made to update "const" variables	Bug	主要
Errors should not be created without being thrown	Bug	主要
Collection sizes and array length comparisons should make sense	Bug	主要
"delete" should be used only with object properties	Bug	次要
"with" statements should not be used	Bug	次要
Cross-document messaging domains should be carefully restricted	漏洞	严重
Code should not be dynamically injected and executed	漏洞	严重
Function constructors should not be used	漏洞	严重
Debugger statements should not be used	漏洞	次要
"alert()" should not be used	漏洞	次要
Octal values should not be used	坏味道	阻断
Variables should be declared explicitly	坏味道	阻断
"future reserved words" should not be used as identifiers	坏味道	阻断
"switch" statements should not contain non-case labels	坏味道	阻断
Function returns should not be invariant	坏味道	阻断
Switch cases should end with an unconditional "break" statement	坏味道	阻断
Conditionals should start on new lines	坏味道	严重
A conditionally executed single line should be denoted by indentation	坏味道	严重

Equality operators should not be used in "for" loop termination conditions Boolean expressions should not be gratuitous			1
Redundant pairs of parentheses should be removed Functions should not be called both with and without "new"  Comma operator should not be used Labels should not be used Labels should not be used Labels should not be used Multiline blocks should be enclosed in curly braces  "switch" statements should not have too many "case" clauses "indexOf" checks should not be for positive numbers Arguments to built-in functions should match documented types Nested blocks of code should not be left empty Dead stores should be removed Array indexes should be numeric Variables and functions should not be redeclared 'delete' should not be used on arrays Function parameters with default values should be last Jump statements should not be used unconditionally Two branches in a conditional structure should not have exactly the same implementation Assignments should not be redundant Functions should not be lerdundant Assignments should not be eredundant Functions should not be defined inside loops Collection and array contents should be used Functions should not be used unconditionally Two branches in a conditional structure should not have exactly the same implementation Assignments should not be defined inside loops Collection and array contents should be used Function should not be inverted A "while" loop should be used instead of a "for" loop Function call arguments should not start on new lines Extra semicolons should be removed  A "while" loop should be used instead of a "for" loop Function call arguments should not start on new function in the properties of the prop	Equality operators should not be used in "for" loop termination conditions	坏味道	严重

Return values should not be	s from functions without side effects e ignored	Bug	主要
Jump statem code	ents should not be followed by dead	Bug	主要
Identical expi sides of a bin	ressions should not be used on both ary operator	Bug	主要
Short-circuit pointer deref	logic should be used to prevent null erences in conditionals	Bug	主要
Related "if/el "switch" shou	se if" statements and "cases" in a uld not have the same condition	Bug	主要
	in a conditional structure should not the same implementation	Bug	主要
The output o	f functions that don't return uld not be used	Bug	主要
	ould be initialized before use	Bug	主要
Values should	d not be uselessly incremented	Bug	主要
Exception sho thrown	ould not be created without being	Bug	主要
Array or Cou should make	ntable object count comparisons sense	Bug	主要
Objects shou immediately	ld not be created to be dropped without being used	Bug	主要
A "for" loop o	update clause should move the e right direction	Bug	主要
Credentials s	hould not be hard-coded	漏洞	阻断
Databases sh	ould be password-protected	漏洞	阻断
Neither DES DESede (3DE	(Data Encryption Standard) nor S) should be used	漏洞	阻断
Cryptographi	ic keys should not be too short	漏洞	阻断
	not be dynamically injected and	漏洞	严重
Cryptographi incorporate C Encryption Pa	ic RSA algorithms should always DAEP (Optimal Asymmetric adding)	漏洞	严重

	Γ	
LDAP connections should be authenticated	漏洞	严重
Weak SSL protocols should not be used	漏洞	主要
"sleep" should not be called	漏洞	次要
Variable variables should not be used	坏味道	阻断
"default" clauses should be first or last	坏味道	严重
Control structures should use curly braces	坏味道	严重
Constant names should comply with a naming convention	坏味道	严重
Cognitive Complexity of functions should not be too high	坏味道	严重
References should not be passed to function calls	坏味道	严重
Parentheses should not be used for calls to "echo"	坏味道	严重
String literals should not be duplicated	坏味道	严重
Conditionals should start on new lines	坏味道	严重
Functions should not be nested too deeply	坏味道	严重
A conditionally executed single line should be denoted by indentation	坏味道	严重
"switch" statements should have "default" clauses	坏味道	严重
Track uses of "FIXME" tags	坏味道	主要
Generic exceptions ErrorException, RuntimeException and Exception should not be thrown	坏味道	主要
"goto" statement should not be used	坏味道	主要
Functions should not have too many parameters	坏味道	主要
Nested blocks of code should not be left empty	坏味道	主要
Unused "private" methods should be removed	坏味道	主要
Functions should not contain too many return statements	坏味道	主要
Method arguments with default values should be last	坏味道	主要
Redundant pairs of parentheses should be removed	坏味道	主要
Two branches in a conditional structure should not have exactly the same implementation	坏味道	主要
Multiline blocks should be enclosed in curly braces	坏味道	主要
Local variables should not have the same name as class fields	坏味道	主要
"switch" statements should not have too many "case" clauses	坏味道	主要
Ternary operators should not be nested	坏味道	主要
Unused function parameters should be removed	坏味道	主要
Unused "private" fields should be removed	坏味道	主要
Collapsible "if" statements should be merged	坏味道	主要
Methods should not have identical implementations	坏味道	主要
Sections of code should not be commented out	坏味道	主要
"for" loop stop conditions should be invariant	坏味道	主要

PHP 4 constructor declarations should not be used	坏味道	主要
"_construct" functions should not make PHP 4-style calls to parent constructors	坏味道	主要
Classes should not have too many methods	坏味道	主要
Deprecated predefined variables should not be used	坏味道	主要
Functions should not have too many lines of code	坏味道	主要
Source files should not have any duplicated blocks	坏味道	主要
"switch" statements should have at least 3 "case" clauses	坏味道	次要
A "while" loop should be used instead of a "for" loop	坏味道	次要
Interface names should comply with a naming convention	坏味道	次要
URIs should not be hardcoded	坏味道	次要
Empty statements should be removed	坏味道	次要
Return of boolean expressions should not be wrapped into an "if-then-else" statement	坏味道	次要
Local variables should not be declared and then immediately returned or thrown	坏味道	次要
Boolean literals should not be redundant	坏味道	次要
Class names should comply with a naming convention	坏味道	次要
"catch" clauses should do more than rethrow	坏味道	次要
Unused local variables should be removed	坏味道	次要
A close curly brace should be located at the beginning of a line	坏味道	次要
Overriding methods should do more than simply call the same method in the super class	坏味道	次要
"&&" and "  " should be used	坏味道	次要
Track uses of "TODO" tags	坏味道	提示

质量配置	ts:Sonar way Bug:24 漏洞:3 坏	味道:27	
规则		类型	违规级别
Types without m not be used in ty	embers, 'any' and 'never' should pe intersections	Bug	严重
	oe used on arrays	Bug	严重
"super()" should	only be invoked once	Bug	严重
Getters and setters should access the expected fields		Bug	严重
Destructuring pa	tterns should not be empty	Bug	主要
Variables should	not be self-assigned	Bug	主要
Constructors should interfaces	ould not be declared inside	Bug	主要

	1	
Non-empty statements should change control flow or have at least one side-effect	Bug	主要
Jump statements should not occur in "finally" blocks	Bug	主要
Non-existent operators '=+', '=-' and '=!' should not be used	Bug	主要
"NaN" should not be used in comparisons	Bug	主要
Loops with at most one iteration should be refactored	Bug	主要
Return values from functions without side effects should not be ignored	Bug	主要
Identical expressions should not be used on both sides of a binary operator	Bug	主要
Array-mutating methods should not be used misleadingly	Bug	主要
Related "if/else if" statements and "cases" in a "switch" should not have the same condition	Bug	主要
All branches in a conditional structure should not have exactly the same implementation	Bug	主要
The output of functions that don't return anything should not be used	Bug	主要
Values should not be uselessly incremented	Bug	主要
Logical OR should not be used in switch cases	Bug	主要
Errors should not be created without being thrown	Bug	主要
Collection elements should not be replaced unconditionally	Bug	主要
Collection sizes and array length comparisons should make sense	Bug	主要
Function parameters, caught exceptions and foreach variables' initial values should not be ignored	Bug	次要
Credentials should not be hard-coded	漏洞	阻断
Code should not be dynamically injected and executed	漏洞	严重
Debugger statements should not be used	漏洞	次要
Variables should be declared before they are used	坏味道	阻断
Function returns should not be invariant	坏味道	阻断
"default" clauses should be last	坏味道	严重
"await" should only be used with promises	坏味道	严重
Union and intersection types should not be defined with duplicated elements	坏味道	严重
Conditionals should start on new lines	坏味道	严重
Conditions should not always evaluate to 'true' or to 'false'	坏味道	主要
Nested blocks of code should not be left empty	坏味道	主要
"delete" should not be used on arrays	坏味道	主要
Comma operator should not be used	坏味道	主要

client

"undefined" should not be passed as the value of optional parameters	坏味道	主要
Two branches in a conditional structure should not have exactly the same implementation	坏味道	主要
Redundant pairs of parentheses should be removed	坏味道	主要
Multiline blocks should be enclosed in curly braces	坏味道	主要
Dead stores should be removed	坏味道	主要
Functions should not have identical implementations	坏味道	主要
Sparse arrays should not be declared	坏味道	主要
Variables should not be redeclared	坏味道	主要
Collection and array contents should be used	坏味道	主要
Wrapper objects should not be used for primitive types	坏味道	次要
"switch" statements should have at least 3 "case" clauses	坏味道	次要
Boolean checks should not be inverted	坏味道	次要
A "while" loop should be used instead of a "for" loop	坏味道	次要
Multiline string literals should not be used	坏味道	次要
Extra semicolons should be removed	坏味道	次要
Boolean literals should not be redundant	坏味道	次要
Redundant casts and not-null assertions should be avoided	坏味道	次要
